

Indonesian Pottery

Terracotta

Terracotta ("baked earth", from the Latin *terra cocta*)

Terracotta pottery

This selection of **exquisite terracotta pottery** are **hand-made** from clay-based ceramics. They are glazed and fired to create colorful, unique and beauty vessels of art. These skilled **potters are from Yogyakarta-Indonesia** who work very closely with our local business partner, dedicated to helping them produce pottery that meets international standards on design and quality.

We collaborate with this business **to expand the potters' markets across the world**. The benefits of this trade are driven back to Indonesia through a fair price to the potters, and also **a social dividend** derived from our own profit made as a socially responsible business.

Let us work together to assist the underprivileged and marginalized Indonesian rural poor to develop and maintain **a better lifestyle**, both today and in future, through a fairer global trading system.
